

In our technology driven society, how will you ensure your hotel's place in a competitive industry? Work with one of the largest and most technologically advanced hotel representative companies around. ReservHOTEL offers many benefits that give you enhanced technology, control, flexibility and solutions to improve the way your hotel does business.

## B E N E F I T S

### Technology

We are setting the latest industry trends! With advanced automation technology you can simultaneously update all Global Distribution Systems, based on your hotel's needs via our secured web site.

In addition, our seamless GDS connections allow for interactive reservations and instant, real-time confirmations.

### Control

Our advancements allow you to maintain control with ease. Through maintenance options on the Web you are in complete control of inventory, availability, rates and information automatically updating to the GDS. And with anytime online access you can:

- Revise your hotel description
- Create special rates for corporate clients and tour operators
- Request inclusion of negotiated rates to select consortia
- Update corporate and tour account information (ie. addresses, contacts)
- Sort and view productions reports online

### Flexibility

We give you more flexibility allowing you to expand your options. You receive a complete suite of online hotel management tools, a stream-

lined reservations process and an automated link between you and your clients. The reservhotel.com site will feature six languages and currently provides real-time reservation access, allowing travel agents to easily access current rates, accurate information, and instant confirmations. You also receive the option for online travel agent commission payments.

### Solutions

We provide innovative ways of doing business more efficiently. Our marketing and advertising initiatives range from GDS ad messaging to availability through Internet booking engines. We also help simplify the consortia membership process for member hotels.

With ReservHOTEL you get enhanced industry presence, negotiated rate assistance, marketing alliances at your fingertips, connections with over 600,000 travel agents and tour operators world wide. As a result, you'll experience increased revenue and occupancy.

### Automatic Updates

Since its introduction in 1996, ReservHOTEL's Internet system has continued to improve on what was already the most technologically advanced system available to independent hotels. It is designed to process a large number of hotel maintenance

operations, distribute marketing initiatives worldwide, operate as an instant online reservations center with real-time confirmations and provide access to database driven GDS reports, all in a secure environment.

Additionally, through ReservHOTEL maintenance section you may:

- View your status (one year calendar)
- Close or open dates in your hotel
- Restrict or open categories (yield management)
- Revise hotel description online
- Change rates online with the GDS as often as you like
- Limit or extend negotiated rates to consortia, corporate clients, or tour operators via a special code
- Update your corporate or tour accounts: addresses, contacts, etc.
- Sort and review production reports by criteria (example: average room rate)

### Affordable Fees

ReservHOTEL does not charge any implementation fee, monthly fees or maintenance fees. New hotels can implement themselves and hotel members can do unlimited updates (availability, rates and hotel description) free. Minimal fees are applicable when hotels request ReservHOTEL to perform these updates.

If you have questions please feel free to call us at 305-354-9400 or e-mail us at [mail@reservhotel.com](mailto:mail@reservhotel.com)
